# Weekly Coal Production

Production for Week Ended:  
July 3, 1982

Released for Printing:  
July 9, 1982

Energy Information

### Highlights

Production of bituminous coal and lignite in the week ended July 3, 1982, as estimated by the Energy Information Administration, was 11,280,000 short tons. In this the first full week of the United Mine Workers of America's (UMWA) 1982 vacation schedule, production declined 5,558,000 short tons, or 33.0 percent from production in the the previous week. Production in the corresponding week of 1981 was 15,325,000 short tons. In 1982, bituminous coal and lignite miners' vacation periods are staggered between June 26 and August 7. Bituminous coal and lignite production from January 1 through July 3, 1982 totaled 438,737,000 short tons, up 22.7 percent from production in 1981.

Production of Pennsylvania anthracite in the week ended July 3, 1982, as estimated by the Energy Information Administration, was 85,000 short tons, a decrease of 40,000 short tons or 32.0 percent from production in the previous week. Production in the corresponding week of 1981 was 133,000 short tons. Pennsylvania anthracite UMWA miners are on vacation between June 26 and July 10. Anthracite production from January 1 through July 3, 1982 totaled 3,261,000 short tons, up 20.8 percent from production in 1981.

*Weekly Coal Production* provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports and exports, and related supply and demand data are provided as they become available.

*Weekly Coal Production* is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).
